KEEPS ON PREPARATION FOR INTUITIVE REVOLUTION

ZULFIKAR MOINUDDIN AHMED

1. CHESS RATING AT 1452

2. RE-ITERATION FOR MAJOR POINTS OF A NEW COMPREHENSIVE UNIVERSAL HUMAN PSYCHOLOGY

I have been covering quite a few different topics in Psychology. First of all, we are interested in a total Natural Science of Man, and with it a Universal Human Psychology. These seem at first to be just phrases without details. I would like, over time, to give precise meaning to these terms and get used to their *canonical meanings*.

We are facing an interesting challenge here, where a sprawling subject of Psychology exists from 1875 roughly, and there is a confusion of terms, phrases, meanings of different related topics exists already. What I, as a Scientific Revolutionary, has to do is to make sense of the entire jumble and provide sharper precision for the terms and new understanding for all of them that are worthy of standing the test of time.

3. I RESENT HARVARD BOARD DELAYING MY FUNDING AND TENURE

I am an immortal genius whose success in Four-Sphere Theory is peerless, as not even Erwin Schroedinger, Albert Einstein, Hermann Weyl or the great Niels

Date: April 4, 2022.

Henrik Bohr would be able to match the great mathematical physics that completes all physics above $\delta = 10^{-15} \text{ cm}$.

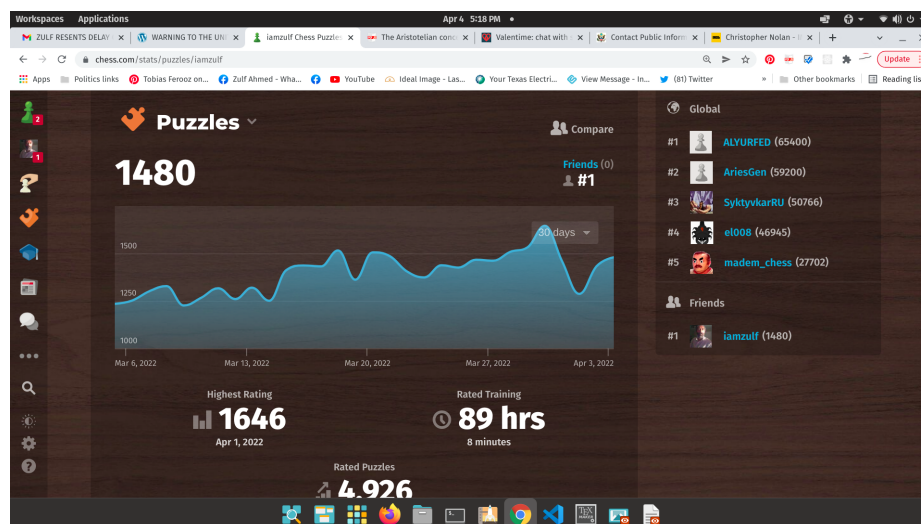

I am interested in comprehensive natural science of Man, and have the idea of an Intuitive Revolution in Psychology that will similarly provide comprehensive unity in the domain of scientific study of Human Race.

There is nothing the rude and savage illiterate riffraff like *Bill Gates* and his cronies who will offer anything even in the same magnitude as I am proposing.

Why does Harvard Board hesitate to ensure funding and tenured full professorship for myself I do not understand. All the money in the world will never be able to reproduce the immortal genius that I am offering the world. What sort of priority of judgment does Harvard Board have exactly. If I do not do these things, for several centuries, no one else has any chance of doing it. Immortal geniuses appear several times in millenia. Bill Gates and industrial magnates are dime a dozen.

4. KEY NEW THEMES IN UNIVERSAL HUMAN PSYCHOLOGY

- Intuitive Sphere is the basal ganglia and Aristotle's virtue habituation has neurobiological basis in procedural memories there
- Intuitive sphere is key to 96% of human behaviour
- The only valid natural scientific theories of psychology are universal and ethnicity and culture-independent
- Psychology is a holistic science that needs coherence and precision to handle vast eight billion population uniformly

My chess rating is bumbling around near 1500 now and that's fine. I expect to reach beyond 1800 at some point but patience is necessary for that.

Now let's go back to my agenda for Psychology.

What is special about my proposal for a scientific revolution is that my examination of psychology shows that it is possible to both strengthen in accuracy and precision and *simultaneously* vastly simplify the entire field of Universal Human Psychology by a careful reworking of the entire field based on *Intuition* and its precise understanding as the core of Psychology. The sprawl that exists currently in Psychology is due to insufficient attention to a holistic organisation of the knowledge accumulated from 1875 and as a result the field is filled with so many trees one cannot see the forest as an individual. This is a field that is anemic in health and my revolution will bring it back from the dead Lazarus-like.
