KEEPS ON PREPARATION FOR INTUITIVE REVOLUTION**

ZULFIKAR MOINUDDIN AHMED  
ZULFIKAR.AHMED@GMAIL.COM

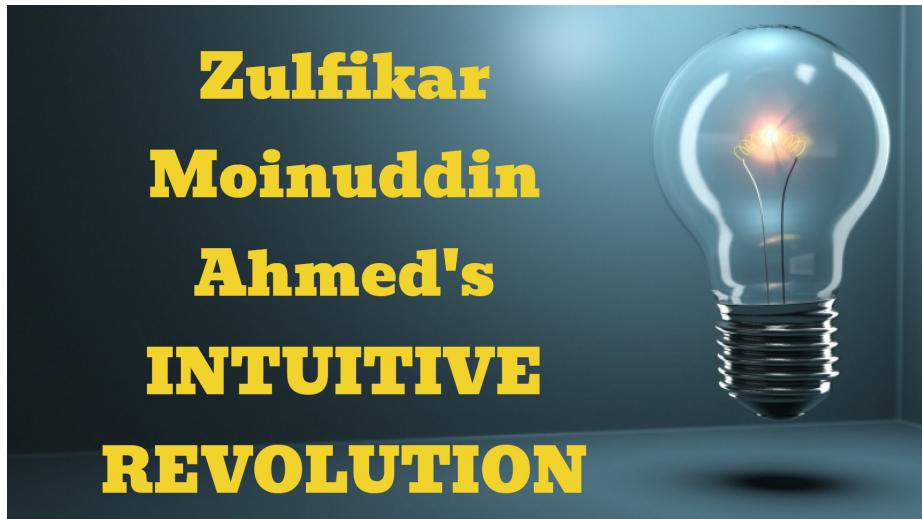

**1. THE HARM BY BILL GATES**

Bill Gates' harm is not a psychiatric disease. This is clearer when, as I begin the new regime of Invega at 6 mg, double the dose I used to have, I am still having constant efforts by Bill Gates considers to harm me. This is because there is nothing schizophrenic about this situation, that Bill Gates is able to harm me from a long distance using illegitimate powers that violate United States and international laws.

This evil vile disgusting brutal savage abomination, this *Bill Gates* must be totally destroyed in order that 100 million American people and billions outside do not have to face these horrific harm in their lives.

It is a matter of great Conscience for me to ensure that this deceptive evil *Bill Gates* is properly exposed for his actual evil and is not able to survive pretending to be a law-abiding civilised gentleman. He is not at all those things.

**2. THE POSTER FOR INTUITIVE REVOLUTION**

**3. A BETTER WORLD FOR EIGHT BILLION REQUIRES A STRONGER PSYCHOLOGY**

I was watching *Blade Runner 2049* and it is beautiful in its design. These dystopian science fiction movies all tell us something about the problem that arises

---

Date: April 3, 2022.

from aggregate effects, in the end, of significant misunderstanding of human nature. Although the phrase "human nature" is quite part of the natural language of English, by and large, the knowledge of human nature is woefully inadequate for wise policies that will evade a dystopian future for my beloved people the human race. A strong robust natural science of Universal Human Psychology is not an option but a necessity to avoid dystopian future for all people. My Intuitive Revolution, therefore, is not a frivolous demand of vanity but one that will be a necessary transformation of the field of Psychology.

#### 4. HARVARD-STANFORD-OXFORD-CAMBRIDGE I NEED IMMEDIATE TENURE AND \$80 MILLION FUNDING

I have done more than enough to deserve immediate tenured full professorship at Stanford – but I am asking for a consider by four institutions, Harvard-Stanford-Oxford-Cambridge. I want to relocate to Mission District San Francisco and expand my company Thyself Inc. I am also quite interested in (a) Quantitative Positive Psychology and (b) an Intuitive Revolution in Psychology. The motivation and the potential are quite clear for these.

I do not understand the purpose of the delay in offer of tenured full professorship and funding by Harvard Board and others. This is a great mutual opportunity that will have great fruits.

#### 5. APPEAL TO HEADS OF PSYCHOLOGY AT HSOC

Dear Psychology Heads of HSOC,

I am not a Psychology Ph.D. but instead studied Mathematics at Princeton (magna cum laude 1995) and was a graduate student at Columbia University 1996-2000 but did not complete my Mathematics Ph. D. I am a successful Scientific Revolutionary in physics [1]. I have a number of monumental breakthroughs in Universal Human Moral Nature that is ethnicity-independent as well as vindication of Aristotle's Virtue-Eudaimonia theory. I am proposing a new scientific revolution in Psychology, the "Intuitive Revolution". I would like immediate tenured full professorship by HSOC and funding for expanding my Positive Psychology-Technology company to be run out of Mission District San Francisco. A great deal of my work are archived and dated in my Github account. They are original work.

#### 6. A RETURN TO KYLE S. SMITH AND ANN M. GRAYBIEL'S HABIT FORMATION PAPER

In this section we are concerned with [2].

We believe that the work done on neuroscience of habit formation is a key to a vast new understanding of Universal Human Psychology, and this is one of the bases for an Intuitive Revolution in psychology. From our viewpoint the brain regions associated with habit-formation are the *intuitive sphere*.

Of course Kyle S. Smith and Ann M. Graybiel are more than right that there is more to habit formation than stimulus-response. But the full scope of the importance of the neurobiological machinery is still not appreciated as these mechanisms are necessary for almost all nontrivial parts of universal human psychology.

## 7. THE CENTRALITY OF THE "HABIT CIRCUITS" OF BASAL GANGLIA

I am extremely interested in the original objections to evolutionary theory of Charles Darwin, which had been to explain moral conscience of human beings. It is worthwhile to see the distance in time, for me especially as a Scientific Revolutionary. Darwin published his *Origin of Species* in 1859. The article of summary of Habit Formation appears in 2016 with a gap of 157 years. The question of moral Conscience and moral Virtues in human beings had not been addressed to the satisfaction of most people in the world in this entire period from evolutionary theory at all. And only now, we can begin to understand the depths of these matters.

The basal ganglia originally evolved some 560 million years ago, and yet in humans, the basal ganglia have mechanisms for intuition for moral virtues by habituation. The objection to Darwin's theory for explanation of Conscience and intuitive moral sense by habituation is still unresolved in more than 160 years and this is what needs to be fully and clearly resolved, among other issues, in an Intuitive Revolution. Human basal ganglia is substantially different from those of other primates, and yet the differences are quite subtle given our coarse descriptions. These issues need to be resolved in order for us to benefit from the enterprise of natural science in Psychology.

I am optimistic that the *final resolution* at least to everyone's satisfaction, is not far away on these absolutely crucial and natural questions.

## 8. THANK GOD FOR YASUO KUBOTA

I'll be quite blunt here. You see, I am accosted by Bill Gates' "I'm white and whites are superior" all day and all night 24-7. I am Asian-American with origin in Bengal. I am the great man who vindicated Aristotle's Virtue-Eudaimonia theory on empirical data from World Values Survey 2017-2020. And I am also the great genius who discovered Universal Human Moral Nature. I am not generally racially biased, but I am most pleased to see *Yasuo Kubota* involvement in neuroscience work on habits. The Europeans did pick up some good elements from Asians even though it was Asians who invented Civilisation, and of course I consider it my sacred duty to correct various unruly elements of the Western Intellectual Tradition with its teenage arrogance that *values are created freely*. This is pure hubris that has no merit. Now I feign some humility in all this because these Mediterranean originated Civilisations are fond of bombing and murdering if they are provoked too much. Japan knows this all too well.

Anyway, it is a pleasure, and sacred duty for me to put the West straight. What else is an immortal genius here to do?

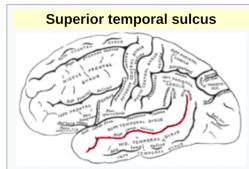

## 9. THE TRUTH ABOUT MORAL VIRTUES IS STILL UNKNOWN

The neuroscientists studying habits for the past few decades place in front of us one of the most important elements of the development of moral virtues in human beings. But the habit circuits are far more important than just moral virtues as they, I hypothesize, are also the repositories of various sorts of skills like chess playing skills and physics and mathematics skills as they are the *intuitive sphere* that is the core of human psychological life.

## 10. NEUROIMAGING STUDIES FOR VIRTUE JUDGMENT 2008

A Japanese team with Hidehiko Takahashi, Motoichiro Kato, Masato Matsuura, Michihiko Koeda, Noriaki Yahata, Tetsuya Suhara, and Yoshiro Okubo did beautiful work on moral praise and blame in 2008 [3].

They found signal for moral praise in Orbitofrontal Cortex, and signal for moral depravity in posterior Superior Temporal Sulcus.

This may seem like it is primarily the neocortex that responds to moral praise or blame. I hypothesize that *the intuitive sphere is directly involved as well* for moral Virtues of human beings in accordance with Aristotle's account of habituation.

It is my firm conviction that the habit circuit is crucial to moral virtues in human beings, and they involve habituation as per Aristotle's theory; then the orbitofrontal cortex and other elements of the brain are activated to amplify intuitive judgments as a secondary effect.

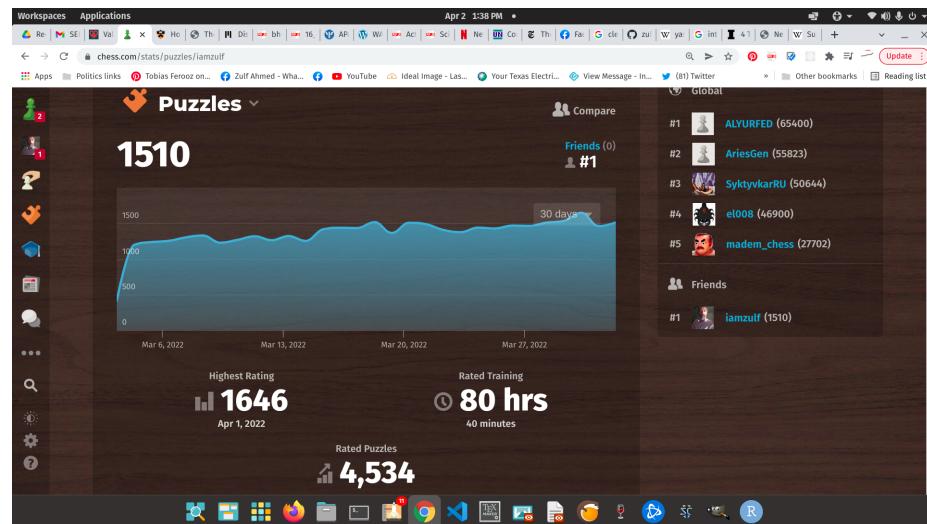

These issues are absolutely crucial for psychology generally and ought to be resolved.

## 11. SOME ROUSING RHETORIC

More than a century ago, Friedrich Nietzsche prophesied that one day Psychology will be the Queen of the Sciences. I, Zulfikar Moinuddin Ahmed, have not been deaf to the call of the great man. The time has come, my beloved human race, that Psychology rise and be coronated as the Queen of the Sciences with my *Intuitive Revolution*. No longer will Psychology be the handmaiden of the manipulative exploitation schemes of the greedy industrialists who want all people to be *productive* like rats in a cage. Today, let Psychology be unfettered and take her position as the great Queen of the Sciences of the most sophisticated and nontrivial type, so that it becomes the envy of all other Sciences. The path is open to us; it is bright and clear, and filled with light and joy at the end.

APRIL 2 2022 6:42 AM ZULFIKAR MOINUDDIN AHMED KEEPS ON PREPARATION FOR INTUITIVE REVOLUTION

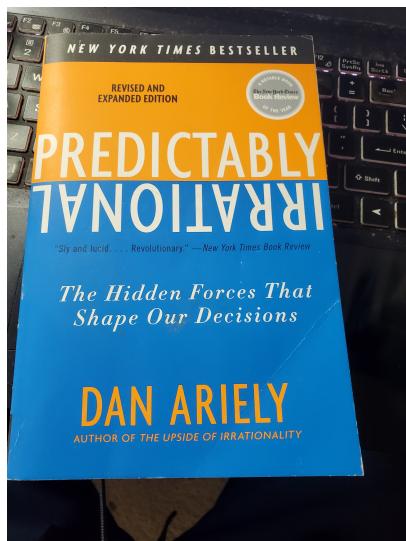

## 12. MY CHESS RATING GOES ABOVE 1500 AGAIN

My chess rating was in the doldrums below 1500 for a while, and it finally rose above 1500 again. It is unclear to me how long it takes for the *intuitive sphere* to be habituated for good chess skills, but what is quite clear to me is that an Intuitive Revolution in Psychology would vastly improve the entire field by making many exquisitely subtle features of human psychology concrete and give depth to thinking about Psychology as well.

## 13. REASON IS THE WRONG CENTER FOR HUMAN PSYCHOLOGY

I have here Dan Ariely's *Predictably Irrational*. I have been a Finance professional from 1995 with my first job as a quant at Lehman Brothers Fixed Income Research, and so I have familiarity with some Behavioural Finance, and that's how I first learned of Daniel Kahneman's work.

This is Dan Ariely's book and it is good. Now the problem with the whole approach to showing that human psychology is not Reason-based is that it is a negative direction. Human psychology's positive basis is the mechanism that makes some things *intuitive*. They don't always match Reason but they have their own regularity. I expect that fruits of an *Intuitive Revolution* will provide firmer basis for a positive human psychology that is not Reason-centered. This is a great coup of Socrates' propaganda that human beings are Reason-centric which was never true at all.

#### 14. EXAGGERATIONS ABOUT OUR BAD CHARACTER

There is some work on honesty in Americans by the number of lies told by people per day. Number of lies per day follow an exponential distribution for 60% and are zero for 40%. I am not compelled with all sorts of horror stories of dishonesty. I am convinced that Dan Ariely and others are severely biased because they look at absolute numbers and do not use the total population and economy in the denominator getting an overblown effect of bad character of people.

#### 15. FRANCISCO AYALA'S PNAS 2010 ARTICLE

Charles Darwin wrote in 1871 in *Descent of Man*, "I fully . . . subscribe to the judgment of those writers who maintain that of all the differences between man and the lower animals the moral sense or conscience is by far the most important." The 2010 article of Francisco Ayala is valuable [?]. He proposes that capacity for ethics is human nature and particular morality as culturally determined. I have new results on universal human moral nature that fundamental morality has universal distribution that is culture-independent; so I have pushed a bit further than the point reached by Francisco Ayala. The issue needs a solid clear answer that satisfies everyone and that is still not in sight.

I like Francisco Ayala's article a great deal because it is an unfortunate tendency for evolution enthusiasts to see more in common between chimpanzees and humans than is reasonable. Our brains are  $1300\text{-}1400 \text{ cm}^3$  to that of  $300 \text{ cm}^3$  in chimpanzees, and there are other notable differences. In a sense, Darwin's ideas are correct for long term evolution, from initial evolution of mammals some 500 million years ago to the first primates 80 million years ago, to humans in the past 8 million years. But I am fully sympathetic to those who reacted negatively to Darwin's evolution theory as *denigrating to human beings*. In fact, this sort of thing is still used by white supremacists in America to denigrate nonwhite people.

I love this summary from Francisco J. Ayala: "Humans are notably different from the apes and all other animals in anatomy, but also and no less importantly in their functional capacities and behavior, both as individuals and socially. Most fundamental are the advanced intellectual faculties, which allow humans to categorize (see individual objects as members of general classes), think in the abstract and form images of realities that are not present (and, thus, anticipate future events and planning future actions), and reason. Other distinctive functional features are self-awareness and death awareness; symbolic (creative) language; tool making and technology; complex and extremely variable forms of cooperation and social organization; legal codes and political institutions; science, literature, and art; and ethics and religion."

I think this is a marvelous articulation, and I appreciate the compactness here.

#### 16. UNITED STATES GOVERNMENT MUST SECURE MY NATURAL RIGHTS VERSUS BILL GATES

Bill Gates is a vile charlatan career criminal and murdererer. United States of America will not be considered a legitimate civilised nation unless my natural rights are secured against wildly outrageous deviation from United States and International Law because there are insufficient monitoring of his exercise of US Industrial Power against the personal life of an American with legitimate papers.

I do not understand what people employed in the United States Government, especially the white employees of the US Federal Government are doing supporting this malevolent criminal, this genocidal megalomaniac *Bill Gates* rather than doing their Constitutionally mandated duty to safeguard natural rights of Americans by totally destroying him and his Evil Empire.

#### 17. THE PIONEERING WORK OF MATTHEW D. LIEBERMAN

I just learned that the identification of pitumen and basal ganglia as the locus of intuition was already *published* in 2000 by Matthew D. Lieberman [4]. This is very good, and I am very pleased because it gives priority to the identification to Dr. Lieberman and I can continue with this work as firm ground on which to execute an Intuitive Revolution in Psychology.

We are now in a better position to conduct our Intuitive Revolution since we know that the habit circuits are justifiably called the *intuitive sphere* and this ensures that our overall Intuitive Revolution idea is valid.

#### 18. ZULF'S GLORIOUS STRATEGY

My Glorious Strategy is to always keep in mind that we are not doing anything for short term gain. We are in the game of *eternal immortal genius*. This is why I always generously credit anyone who *agrees with me at all* and give them priority. In the end, the truth is that I am right because I'm right. But if someone else, such as Matthew D. Lieberman had done right work before me, they will be in the end various bases of support for my immortal genius and glory anyway, so I am always generous and kind to them. That's the best policy. The eternal future will otherwise find the sneaky low and small attempts to deny someone their due

credit and even Isaac Newton and James Clerk Maxwell might seem greater and more glorious than myself which is obviously an unacceptable sort of situation. It's patently *absurd* that this situation could arise. Those sorts of absurdities arise when you cheat people of their due credit, or are seen in history to have done that. That's never a good strategy.

#### 19. WELL OBVIOUSLY I AM A GREAT IMMORTAL GENIUS

I have my Natural Rights World Order proposal already at the United Nations. See here is the PR.

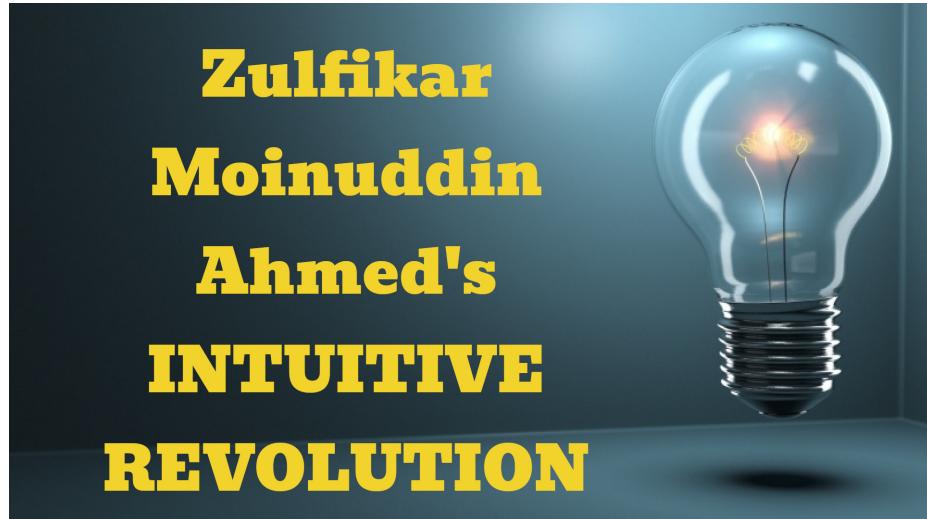

This is a proposal for securing natural rights of every human being born on Earth. This is a good immortal genius sort of proposal. As an immortal genius, it's my duty to counter any White Racial World Order proposal with this.

#### 20. INTUITIVE REVOLUTION WILL MASSIVELY IMPROVE UNIFIED UNIVERSAL HUMAN PSYCHOLOGY

Intuition is still barely understood in a concrete way, and there are still pockets of resistance within psychology for Universal Human Psychology. My empirical results have given us firm justification that moral human nature has regularity across the entire human race and that virtue-eudaimonia theory is true.

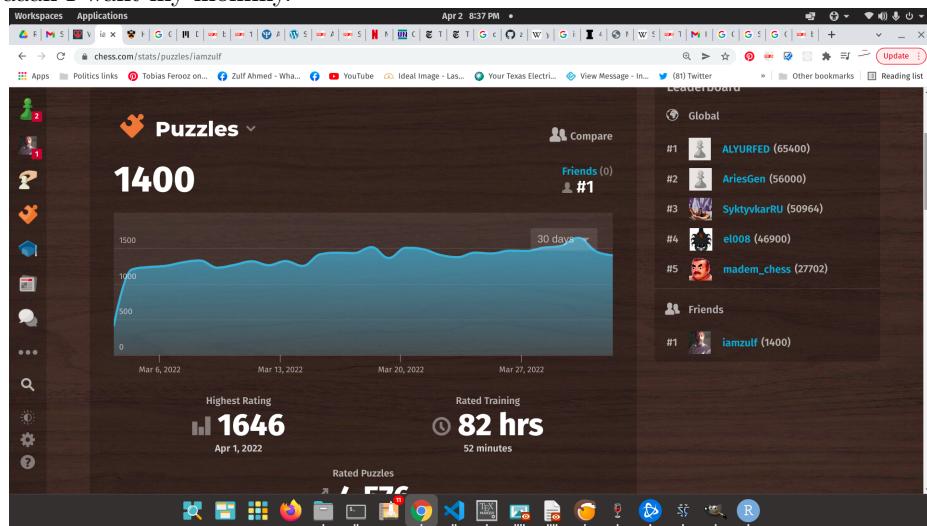

The notion that intuition is developed by habituation; and that Aristotle's theory is a specific example of this process for developing *moral intuition* and that the learning processes for intuition is power law of practice, these merges are ill-understood and an Intuitive Revolution will make clearer and more stable and solid a holistic understanding of Universal Human Psychology that will withstand the test of time. It is an inevitable revolution, and I am simply triggering it right now when the time is ripe for this Intuitive Revolution of mine.

APRIL 2 2022 6:42 AM ZULFIKAR MOINUDDIN AHMED KEEPS ON PREPARATION FOR INTUITIVE REVOLUTION

## 21. Boo Hoo Hoo My Rating Dropped To 1400

My sloppy chess playing led to my rating dropping to 1400. I want my mommy. Waaah I want my mommy.

## 22. RETURNING TO ARISTOTLE

Aristotle's main contention that is always on my mind these days is that it is habituation that is responsible for Virtuous Character. This is true, and we want to ensure that we understand the specific ways that the *intuitive sphere* produces virtuous character in human beings, because we need certain knowledge regarding universal human psychology. This is one of the most important problems in all of human intellectual questing in eight million years. The right answer here will transform the future of the human race.

Naturally, given its centrality, I, the immortal great genius, and I alone have to solve this problem for my beloved people the human race.

### 23. IDENTIFICATIONS OF INTUITIVE REVOLUTION

One one hand we have "intuitions", "habits", "moral virtues" and on the other hand we have "basal ganglia" and "pitumen". The association of these words and concepts together give us the locus of the "intuitive sphere" that develops in every human being by habituation. This would be the simplified central change in the Intuitive Revolution. These are clear and simple in one way, but they have never been understood as part of Universal Human Psychology in any time in the past in East or West at all. And for this reason the Intuitive Revolution for Universal Human Psychology will have a transformative and profound impact on the entire species.

### 24. RELATION BETWEEN MY INTELLECTUAL AND ENTREPRENEURIAL INTERESTS

Consider an Intuitive Revolution that shows us how, precisely, habituation to high moral Virtues produces higher moral intuitions and then that leads to higher Life Satisfaction. This is Aristotelian viewpoint and it will be proven correct in a great deal of detail.

My idea was what in entrepreneurship? It was *Quantitative Positive Psychology* products and services. We can reason our way to see the relationship here between my intellectual interests and my entrepreneurial interests. On one hand we have the Intuitive Revolution in Psychology; on the other hand we already know the relationship between realised Virtues (by habituation) and higher Life Satisfaction. This then produces a "Virtuous Circle" that leads to great technological products and services by a technology company to shore up people's Virtues and ensure higher Life Satisfaction Globally by applications of Quant Positive Psychology.

Conceptually this clarity is central to my greatest dreams and ambitions for myself and my service to my beloved people the Human Race.

### 25. UTOPIA OR DYSTOPIA DEPENDS ON OUR ACCURATE UNDERSTANDING OF NATURAL SCIENCE OF MAN

I assure my dear reader that Bill Gates is the loser and I, Zulfikar Moinuddin Ahmed, am the winner. You see, while Bill Gates was deceiving the world and pretending to be a philanthropist and planning out his gaudy ostentatious Xanadu with shark tanks in his living room, I, the true genius spent years of my life pondering what is the right thing for me to do to benefit all eight billion of my beloved human race. I converged on the understanding that I ought to improve Life Satisfaction of all the people of Earth. And what has Bill Gates been doing? He's been pretending that Hammurabi was white and following a fictional script from C rated Hollywood Movies that ends with Dystopia for the world.

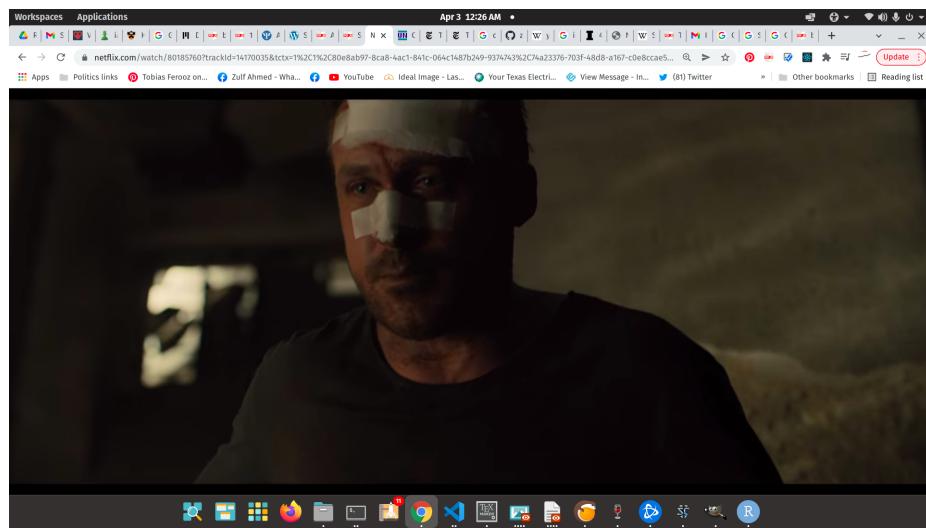

### 26. BENGALI ETHNIC AMERICANS ARE JUST AS AMERICAN AS EVERYONE ELSE

This stupid man Bill Gates seems to think that America is something quite different than what we think America is, while he has goddam shark tanks in his goddam living room. Bengali-ethnic Americans are just American; German-ethnic Americans are just American; Japanese-ethnic Americans are just American. This

APRIL 2 2022 6:42 AM ZULFIKAR MOINUDDIN AHMED KEEPS ON PREPARATION FOR INTUITIVE REVOLUTION

stupid illiterate man Bill Gates seems to have some ethnic scheme for this multi-ethnic classical liberal democratic Republic. We cannot tolerate this in this country.

## 27. BLADE RUNNER 2049 SCENE OF HUMAN FRAILTY

After the father is taken away and Joe the Blade Runner is wounded, the frailty displayed to the girl is quite touching. The movie has great cinematic taste and style and is very good. It has one quality that I appreciate with Tarkovsky movies, which is a sparing use of music in important moments. The taste is highly developed.

Now you might think my current chess rating of 1373 drove me to distraction, in a turn away from the shame and feelings of inadequacy. That is not my explanation. I was just evaluating this movie, a habit of mine. I was so impressed by *Andrei Rublev* of Tarkovsky several decades ago that I became quite a connoisseur of the art. There is some of Lars Von Trier's *The Element of Crime* in *Blade Runner 2049* and it is a good movie. Very nice aesthetic.

## 28. BILL GATES WILL MAKE A NICE SOUVENIR ONE DAY

The Zulfikar Moinuddin Ahmed's souvenirs are usually old books, some movies, some music. I don't have many old genocidal white men with racial domination pretensions in my souvenir collection, but it looks like Bill Gates really *wants* to be part of my extra little toys collection. Well, I'll leave this up to United States Government. Who told you to give this horrible abomination wealth and power exactly? Nothing worse has ever crawled out of a woman's womb in human history.

## 29. BILL GATES "WHITES ARE SUPERIOR" IS BULLSHIT THAT DOES NOT BELONG IN AMERICA

Look Bill Gates, "Whites are superior" is bullshit that does not belong in America at all. It's not opinion. There are genocides in America and slavery due to it. You want this? Ship out of my country, ok? This shit does not belong in America.
