

APRIL 13 2022 12:34 PM ZULFIKAR MOINUDDIN AHMED RUMINATES ON VIRTUES AND LIFE SATISFACTION

ZULFIKAR MOINUDDIN AHMED
ZULFIKAR.AHMED@GMAIL.COM

For me a useful thought is to consider life satisfaction as a function of virtue levels, and then consider how to maximize life satisfaction.

"Gather round, I have a tonic that will make you happy, healthy, wealthy, and wise! Just be virtuous!"

That is a representation of Jonathan Haidt of what sages and elders have said in the wisdom literature of all cultures. My vindication of Aristotle's Virtue-Eudaimonia Theory tells us that the sages are right.

But it is foolhardy to tell people to be virtuous without giving details of which particular virtues, what appropriate acts will improve the virtues, and what is the cost to habituate to any virtues. Without those details, these exhortations are not as valuable.

I ought to write an open letter to Jonathan Haidt informing him that in 2021 I had discovered in World Values Survey data that high moral values correlate to high life satisfaction. And this discovery removes from the aura of mysticism from the sages and elders of all cultures regarding the value of virtues in producing high life satisfaction.

1. OPEN LETTER TO JONATHAN HAIDT

Dear Professor Jonathan Haidt,

In Chapter 6 of your *The Happiness Hypothesis on Virtues* you were still unaware of the empirical relationship between moral Virtues and Life Satisfaction that I discovered in 2021 [1]. Perhaps you will find it fruitful to review my works which might allow you to present Virtues with some more confidence regarding why the sages and elders were indeed telling the youth the truth.

Thanks,

Zulfikar Moinuddin Ahmed

2. PLAY IN DEVELOPMENT OF SOCIAL VIRTUES

I am reading Patricia S. Churchland's *Conscience: The origins of moral intuition*.

"In play, unfairness is recognised, and patterns of dealing with it emerge." (p. 97)

The issues of Bill Gates efforts to destroy me, kill me, deny me my American Dream and deserved successes are poignant examples on his part of failure to absorb any lessons in moral development.

Date: April 15, 2022.

Now my own Conscience is more highly developed and immediately I sensed his danger to 100 million non-white Americans and billions around the world. He acts not through the physical world but by long-distance exercise of power in ways that are illegitimate, for example destructive invasion of my private meta with use of US Industrial and War Power while I was isolated in Allen Texas with efforts to curtail my success according to extreme fringe racial ideology that he does not make public. The man is a dangerous war criminal and he has no talent in either mathematics or science or coding and rose to great power and wealth by criminal deceptive means.

My conscience demanded that I make these discoveries known to the wider world who he had fooled for decades.

3. CENTRALITY OF MORALITY IN ALL MY FUTURE ENDEAVOURS

Several years ago I was not interested in moral Virtues at all. I was interested in the general question of what sort of thing is *adapted* to our natural unique personality. The idea I had then was that we have some unknown elements in our unique personality, at least unclear and unknown to ourselves, and if we could make these clear and shed light on them then we can adjust to be more harmonious to the latent features of our natural selves with various benefits. I became interested in the Five Factor Personality model then.

Eventually I discovered in 2021 that high *moral values* correlate in the global population to higher *life satisfaction* supporting Aristotle's Virtue-Eudaimonia theory. This is a gigantic discovery that is robust and solid, that is my own original discovery, and this led me to consider the ancient wisdom of all cultures that virtues will lead to higher life satisfaction for everyone.

When was the first time I declared that the future of technology was in Personality Psychology?

4. LETTER OF SEPTEMBER 8 2019

ZULFIKAR MOINUDDIN AHMED'S PERSONALITY ORBITAL THEORY SCHEME THAT WILL TRANSFORM THE WORLD Inbox

zulfikar.ahmed@gmail.com; Sun, Sep 8, 2019, 4:44 PM

Ladies and Gentlemen,

My Personality Orbital theory scheme is based on the hypothesis that the following scheme of variables provide sufficient specificity in a human being's personality to fully specify the person among seven billion human beings.

The scheme is

$$O^{+/-} C^{+/-} E^{+/-} A^{+/-} N^{+/-}$$

And the values are $+/-$. This is not exactly achieved in the numerical matrix that came out of solving the optimization problem that produced maximal uniqueness in the distribution of human personality with 1000 samples, but it is quite close; the actual values of the variables require the coefficient matrix and 16 variable refinement of the Big Five personality traits. But examination of the matrix suggested the scheme here.

So here is my bold claim that I believe is justified and ought to be verifiable in the next days and weeks. The above scheme, which I name the PERSONALITY

ORBITAL VARIABLES for now, provides uniqueness of personality of all human beings with a very high probability.

Human interest in understanding how we are absolutely unique in personality across seven billion people is natural and deep, and my approach to this problem is strictly based on scientifically valid variables with a great deal of research (OCEAN) and also my continuing work on uniqueness.

This can be used as PERSONALITY DNA in a great deal more refined fashion than all extant personality testing output and this is a quantum leap in personality psychological measurement than all existing such things in the world.

I believe that this will quite naturally dominate the globe in terms of personality testing metric with some effort and since the numeric data used for this is associated to a massive amount of research that use Big Five Personality traits as well, we ought to be able to provide enormous amounts of solid research of likelihood of all sorts of contingencies based on the Personality DNA that can lead to improvement of the human condition.

PSYCHOLOGY is the frontier today of technology, and this I believe is at the cutting edge of personality psychology.

We must remember that it is well-established by work of McRae and Costa and others that Big Five have heritability of 50-60 percent. This leaves 40-50 percent of personality that is withing individual control to improve for better lives across the globe and I would like to be at the cutting edge of providing tools to my people the Human Race to improve individual lives. We all live for a very short period of time and it is thus quite important to ensure that all human beings have the tools for self-understanding so that we may have more fulfilling lives.

This is the basis of my efforts toward Thyself which I am still dilly-dallying about incorporating till the product idea is stronger. This is the future of technology industry.

Thanks, ZULFIKAR MOINUDDIN AHMED

5. THE NECESSITY OF GOOD HIGH QUALITY TECHNOLOGY IS ESSENTIAL

The necessity of technology is not a secondary issue in these problems because the problems require delicate ways of avoiding combinatorial impossibility in AI strategy and software design. Here we have to go much further than the heuristic search ideas of Herbert Simon and others in the 1950s for chess playing. What is important to understand is that my results guarantee that there will be fruit on global life satisfaction to efforts of this type.

6. THOUGHTS ABOUT MORAL VALUES AND PERSONALITY DIVERSITY

In her acknowledgments Patricia S. Churchland writes about the issue that because of personality differences, one-size-fits-all moral systems are inadequate. I strongly disagree. My work shows that outside of *mating values* where there are genuine differences, moral values unrelated to mating are strongly regular for the entire human race and therefore the issue of whether universal values here are sensible and adequate are not in much doubt.

Universal values do exist, and they are extremely important to decipher, to refine and become a topic of widespread discussion and verification. I am a strong adherent of Virtue Ethics, and the deontological 'systems' are theories along the way to understanding universal moral laws that humans carry in our genetics. There

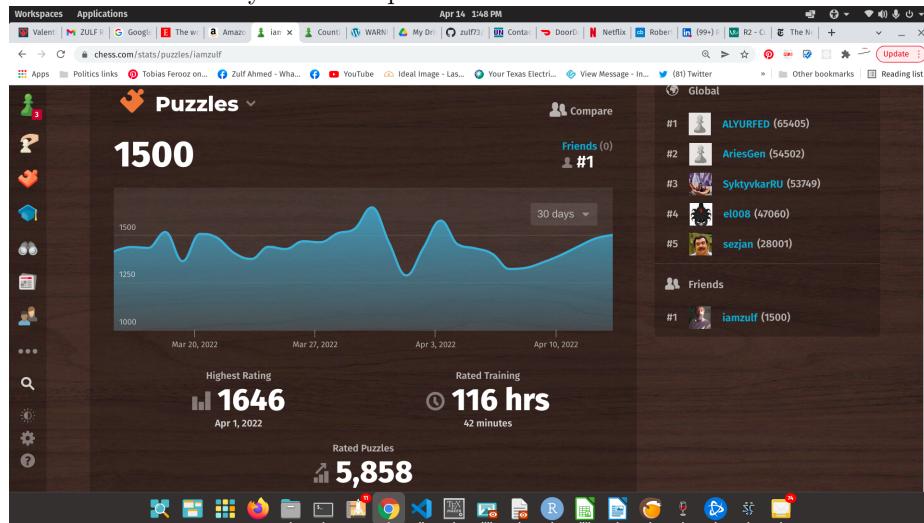

might be debates about which values are universal but I do not feel there is any valid view to nonexistence of universal moral values.

7. MY MOTHER IS UNABLE TO PAY FOR ELECTRICITY AND GAS

I am extremely disappointed with Harvard and Stanford Boards for their delay in tenure and funding for me as now my mother is unable to pay for electricity and gas while people who live in relative luxury are delaying on obvious decisions to tenure and fund me for good reasons. I do not understand how this is even possible.

8. MY CHESS RATING RANGE IS BETWEEN 1250 AND 1500

The record of the past 30 days shows that I have been above 1250 the entire time with small probability of being above 1500. I am a novice chess player and this is reasonable for my level of experience.

What is important to understand is that Virtue Levels have a similar gradation, something that had not been measured in the past with precision, and practice will change the levels. This is for work to be done in the future, and there ought to be a quantitative relationship to life satisfaction levels that is universally valid. It is the latter relationship that gives promise for a global improvement of life satisfaction levels, and why Harvard and Stanford Boards ought to tenure and fund me without delay.

9. MY PHOTOGRAPH APRIL 14 2022

10. VISIT BY JASMINE SACKY APRIL 14 2022

Jasmine Sackey dropped by to see how I was doing and I discussed how it was not a problem for me to take the Invega and Trazedone by whatever dosage the doctor prescribed but that my worry is still the exercise of power illegitimately against my person by Bill Gates who has convictions about a white racial supremacy agenda and had decided to use powers to sabotage my success.

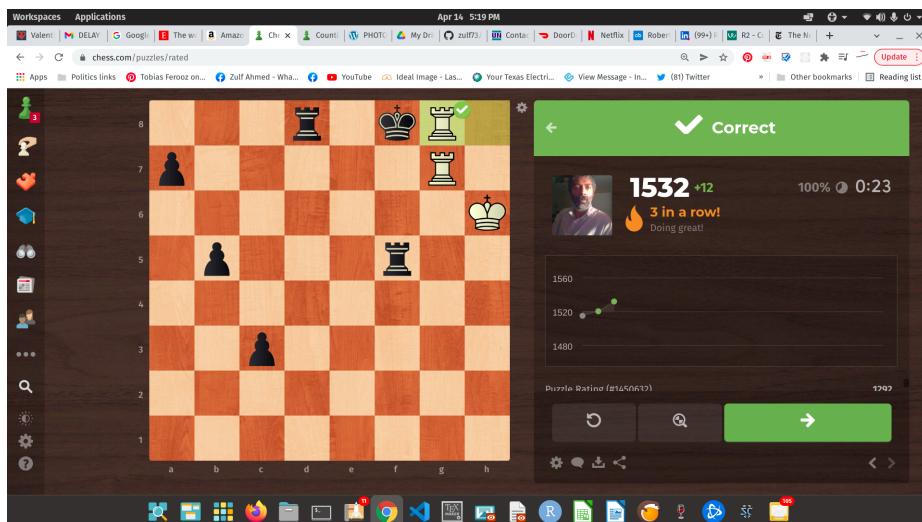

Unless Harvard Board and Stanford Board overcomes all Bill Gates demands and tenure and fund my efforts obviously they will risk ruining their reputation as well in the process.

I have a good sense of the value of my innovations which rise above the academic accomplishments and provide firm ground for a revival of Aristotelian Virtue-Eudaimonia on empirical grounds from World Values Survey. This is a significant breakthrough from the direction the enlightened in Europe have gone for a long time with Robert Musil writing *The Man Without Qualities* and Albert Camus *The Plague* and *The Stranger* and I deserve to be recognised and funded by Harvard and Stanford. The delay in the funding reflects very poorly on the integrity of Harvard and Stanford.

11. BILL GATES HAS BEEN HARMING MY PHYSICAL BODY FOR MORE THAN A YEAR

I am a scientific man, and in a different time in my life, I would have scoffed at anyone claiming that with a physical world distance of 2100 miles that one man can physically affect harmfully another man. Alas, being a victim of war crimes by 'meta' by Bill Gates and having taken a great deal of strong psychiatric drugs, it is clear to me that this is no psychiatric delusion, and that Bill Gates had found 'innovations' on how to harm people in their physical body by meta power maneuvers. This is a great cause for alarm among the 100 million non-white Americans as he might expand his reach. It is a matter of Conscience for me to speak loudly and clearly of the grave danger of not stopping Bill Gates permanently.

12. MY CHESS RATING REACHES 1532

At the moment, this is the upper end of my chess ability and I am proud of this. But it is not here where I have been the best for in chess I am a novice still. I am far more proud of reviving Aristotle's Virtue-Eudaimonia theory on a universal human nature scale, and there I have shown far more magnificent achievement.

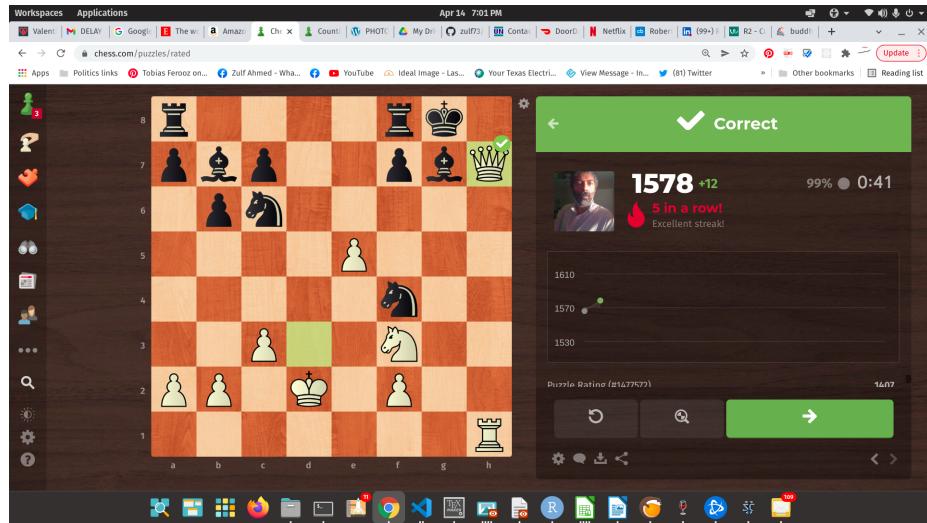

13. I WANT \$80 MILLION FOR 40% OF THYSELF INC. FROM HARVARD BOARD

With many new groundbreaking scientific innovations in the arena of human moral nature and life satisfaction of all human beings, I believe that \$80 million for 40% of Thyself is a good investment for Harvard Board. I plan to use to funds to relocate to Mission District San Francisco and begin work on producing goods and services to engage with people and improve their life satisfaction.

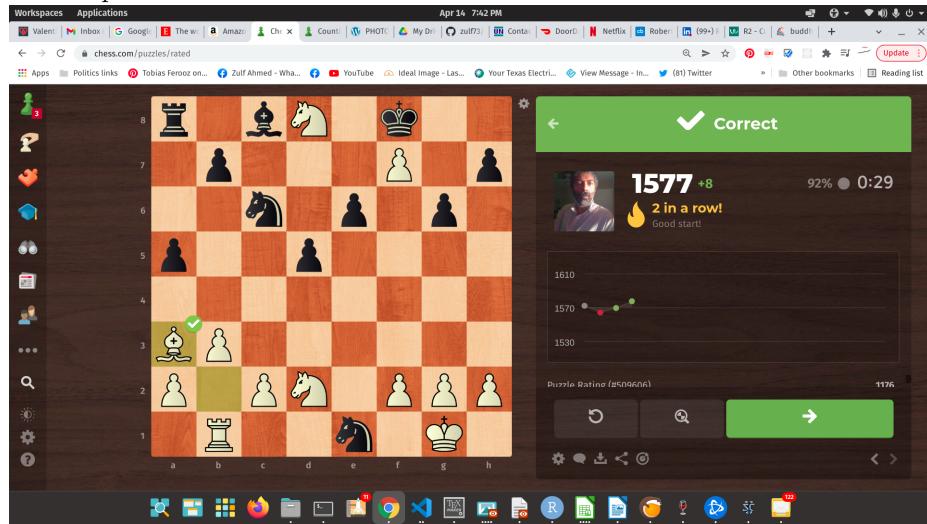

14. I SEE SLOW MOVEMENT AT HARVARD BOARD

My chess rating is at 1578 which is at the upper ranges of my current ability.

APRIL 13 2022 12:34 PM ZULFIKAR MOINUDDIN AHMED RUMINATES ON VIRTUES AND LIFE SATISFACTION

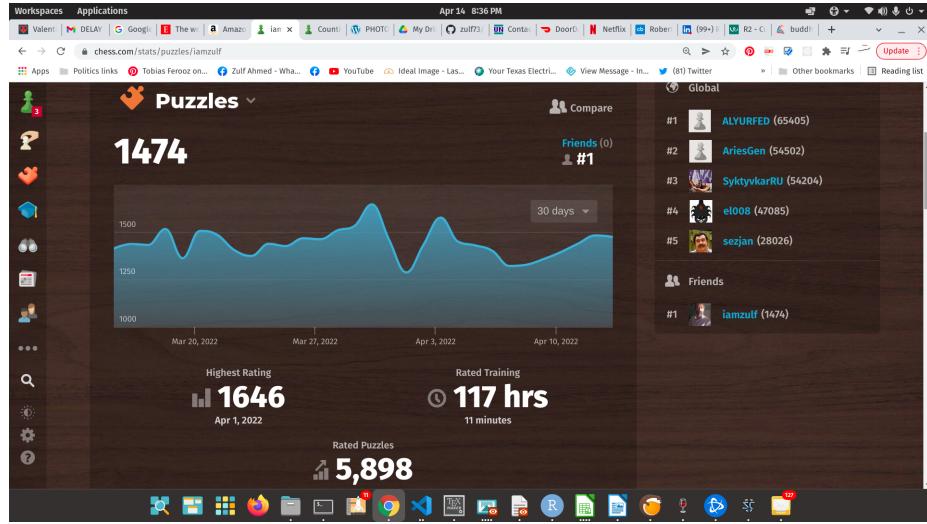

I begin to hear in meta that Harvard Board wants to tenure and fund me \$80 million for 40% of my company. This is a good move on their part, and I hope they show some resilience and come through with actual results where I have access to the funds despite vehement opposition by Bill Gates who has convictions that no non-white person can succeed in America.

As the reader can see, practice does improve skills like chess, and my major hypothesis is that in quantitative improvement of Virtues, practice has a power law as in chess, and Aristotle's habituation to Virtues can produce quantitative results.

15. BILL GATES IS A HARCORE ZEALOUS WHITE RACIAL IDEOLOGY MAN

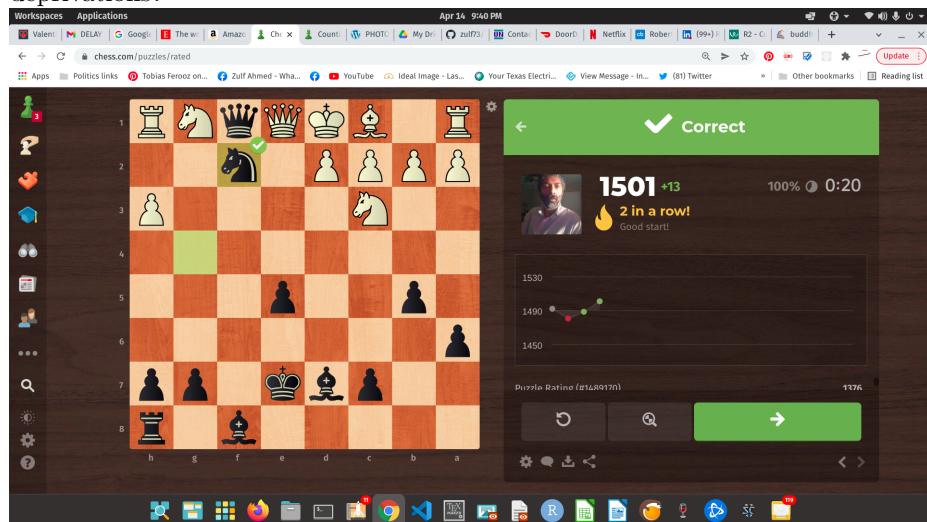

I just realised that people do not understand that Bill Gates is a hardcore white racial ideology man and that is why he is harming me for he is at war to destroy all non-white people with any potential for success.

When Harvard or Stanford Board or anyone delays my tenure and funding, they implicitly support Bill Gates intolerable white supremacy ideology regardless of their reasoning.

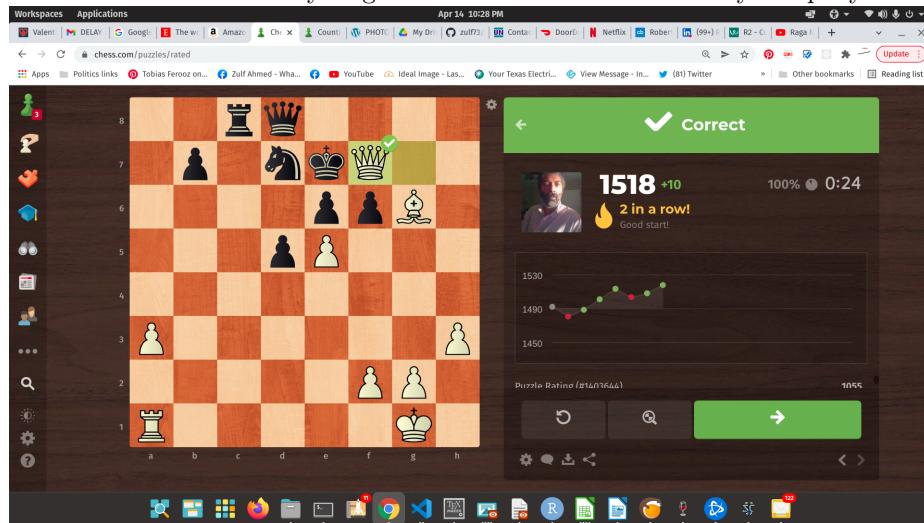

16. HARVARD BOARD MUST FOCUS ON DELIVERING MONEY TO MY BANK ACCOUNT

The great issues of the day including racial strife and Bill Gates' decision to become zealous on Racial Supremacy are all epic, but before Harvard Board gets too enamoured of its Heroic War against racial zealotry I must remind them that I need money right now and my work was not supported by anything other than menial disability income for a decade. Why don't you prioritise funding to me before you get embroiled in a public spectacle that draws in thousands of organisations in America in these conflicts so I can save my mother from a preventable death due to deprivations?

17. SO HARVARD BOARD IS PREPARING FOR WAR AGAINST BILL GATES HUH?

I approve of this, a war to prevent people with money being malevolently racial in America as the country is 60-40 in white non-white today and will not survive prominent wealthy people essentially harming the racial harmony of the nation. This is a great idea, but I don't want to be a casualty of the war. Why don't you scour the Earth to find a way to get me \$80 million for 40% of my company first?

18. NO NO NO I WANT FULL \$80 MILLION FOR 40% OF THYSELF

Harvard Board, I don't wany any change. I want full \$80 Million for 40% of Thyself for funding. This is the sum that I think will lead to success. Smaller sums are wasted funds.

19. FOUR-SPHERE THEORY IS THE BEST PHYSICS THEORY FOR SPIRITUALITY

Four-sphere theory gives the strongest mathematical physics able to reach all aspects of reality including issues of non-local phenomena. For spirituality, the existence of a compact four-sphere is the most insightful understanding of how a mathematical physics gives full account of phenomena without any conflict with observable macroscopic physical phenomena.

20. EXISTENCE OF PSEUDO SOULMATES BY ZULF'S Q-METRICS

Besides the monumental results I have already spoken about I also have results on thousands of personality types in data, and on existence of pseudo-soul mates by these personality types where there exist 'best' personality matches based on relatively solid matching metrics.
